TECHNICAL SKILLS

Languages & Frameworks: HTML5, CSS3, JavaScript (ES6+), React.js, Node.js, Express.js, SQL, NoSQL (Firebase, MongoDB)

Tools & Systems: Git, GitHub, Webpack, Figma, RESTful APIs, Postman, Sentry (Learning), Prometheus (Learning), Firebase, Linux/WSL

Data & Analysis: Python, R, Excel, QGIS, API Data Visualization, Data Cleaning & Analysis

Design & UX: Responsive Web Design, Cross-browser Compatibility, UI/UX Wireframe Implementation

Other: Python, R, Excel, QGIS

Soft Skills: Problem Solving, Collaboration, Technical Documentation, Analytical Thinking, Customer Support, Agile Mindset, Continuous Learning

Other Technical Skills: API Authentication (OAuth2, JWT), JSON Parsing, Debugging & Log Analysis, System Integration Testing, Cloud Platforms (AWS/GCP basics)

PROFESSIONAL CERTIFICATIONS AND TRAINING

Career Readiness Mentorship Global Mentorship Initiative	View Certificate	4/7/2025
Full Stack Development Moringa School	View Certificate	31/12/2020
Exercising Leadership: Foundational Principles HarvardX	View Certificate	11/08/2022

PROFESSIONAL EXPERIENCE

Frontend Developer (Freelance & Hackathon Projects) <i>Remote Various Projects </i>	Nairobi, KE <i>2023 – Present</i>
- Developed and deployed responsive web applications using React.js, HTML5, CSS3, and JavaScript (ES6+), ensuring scalability and seamless user experiences. - Integrated and debugged RESTful APIs to support dynamic content, data synchronization, and external service connectivity (e.g., Firebase, Google Maps API). - Implemented authentication and authorization using Firebase (JWT-based token management) to enhance data security and user experience. - Monitored and troubleshooted application errors through browser developer tools, Firebase logs, and console diagnostics to ensure smooth performance and uptime. - Collaborated cross-functionally with UI/UX designers and backend developers to triage integration issues and deploy fixes efficiently. - Optimized system performance by refining API calls, managing state effectively, and ensuring responsive design across multiple browsers and devices. - Documented project workflows, API endpoints, and testing procedures, contributing to clearer handoffs and improved debugging efficiency. - Key projects include: Share-a-Meal - Live Demo Web platform linking surplus food donors with CBOs; ranked 11th/60+ at Nairobi Innovation Week 2023. Tuende - Live Demo Smart bus booking app enabling users to track and book buses in Nairobi in real time. Elysian Mind - Live Demo Mental health web app with AI-powered virtual doctor; GirlCode Hackathon 2024 Winner. GitHub	

4. **Masomo Chap Chap - [Live Demo](#)**

Education app aligned to Kenya's CBC curriculum, showcased at NIW 2023.

Strathmore Energy and Research Centre

Strathmore University

Intern Engineer

Jul 2025 – Present

- Support research and analysis on renewable energy technologies
- Feasibility assessments, preparing technical reports, and assisting in project development and stakeholder engagement for clean energy initiatives.
- Energy efficiency studies and data collection to support ongoing research projects.
- Analyzed 15 Erasmus+ Horizon project calls, aligning with the consortium research priorities.
- Drafted two concept notes and conducted climate data analysis for ongoing projects.
- Supported literature reviews and research for two academic papers under development.

UNESCO Chair for Climate Change Resilience & Sustainability

Strathmore University

Intern Engineer

Jul 2024 – Apr 2025

- Collaborated with multidisciplinary teams on data visualization and interactive documentation.
- Prepared technical documentation in alignment with project guidelines.

Environmental and Biosystems Engineering Students' Association

University of Nairobi

Web Developer & Managing Editor

Apr 2018 – Sep 2018

- Collaborated with multidisciplinary teams on data visualization and interactive documentation.
- Prepared technical documentation in alignment with project guidelines.

EDUCATION

University of Nairobi

Nairobi, KE

BSc Environmental and Biosystems Engineering

Graduation Date: Sep 2020

- Final Year Project: Designed a Flue Gas Desulfurization System, reducing SO₂ emissions by 95%.
